Education

Maynooth University — Maynooth, Co. Kildare
Bachelor of Science in Computer Science, Multimedia, Mobile and Web Development — *Aug. 2021 – 2025*

Technical Skills

Languages: Java, Python, C/C++, SQL, TypeScript, JavaScript, HTML/CSS, React
Technologies: Git, VS Code/Community, Visual Studio, Eclipse, Node.js, MongoDB, Linux, Photoshop, Illustrator, Premeire Pro, Affter Effects

Projects

Personal Portfolio Website - My Portfolio | *TypeScript*

- Designed and developed a portfolio site which contains my software engineering and graphic design projects.
- Used this project as an opportunity to enhance my skills in UI/UX design.
- Further improved my knowledge in TypeScript.
- The development process showed me what to consider when designing UI for a website

Multi-user Magazine - Plush magazine | *Firebase, TypeScript, React*

- Developed a magazine inspired website layout to deliver a visually engaging and fun user experience.
- Built social posting features enabling users to express their thoughts and share images together in a single post.
- A user experience designed for fast and easy navigation, with a simple user interface and minimal icons.
- Integrated Firebase for secure user authentication and data management.

Album Cover Search Engine - Look-ups | *Spotify API, JavaScript, React*

- Developed with React.js, Viewing and downloading application for music album covers.
- Utilized Spotify API to retrieve album art and album info.
- Implemented search function for ease of user.
- Currently developing the mobile application for release on the Google Play Store and Apple App Store.

Directed graph search algorithm | *Python, NetworkX*

- Developed a python algorithm to search and match directed graphs.
- Algorithm uses HTML graph visualizations to extract attributes.
- Extracted attributes are used to match and retrieve most similar graph from a selected search space.

,

Experience

Frontend Developer Intern — Maynooth, Co. Kildare
Maynooth University — *February 2024 – February 2025*

- Designed UI/UX templates in Figma to meet diverse project requirements.
- Developed functional prototypes from UI designs.
- Collaborated in a team to build computational thinking games using React.
- Worked effectively under pressure to meet tight project deadlines.
- Balanced multiple tasks across game development, UI design, and full-stack web development.
- Debugged and tested code independently and supported team members in resolving issues.
